Applicant								
THOMSON LICENSING S.A. et al.								
1. This	report is the	International						
Auth	This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.							
	This REPORT consists of a total of 4 sheets, including this cover sheet.							
3. This	This report is also accompanied by ANNEXES, comprising:							
a. ⊠	a. 🖾 sent to the applicant and to the International Bureau) a total of 1 sheets, as follows:							
	sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).							
	☐ shee	ts which supersec	ie earlier sheets, but w	hich this Authority cor	nsiders contain an amendr dicated in Item 4 of Box No	nent that goes		
		iomoniai box.						
b. L		<i>he International Bi</i> e listing and <i>l</i> or tab	<i>ureau only)</i> a total of (I les related thereto, in c	ndicate type and number	ber of electronic carrier(s)) m only, as indicated in the	, containing a		
	Box Rela	ting to Sequence	Listing (see Section 80	2 of the Administrative	e Instructions).	Supplemental		
,								
4. This	report conta	ins indications re	ating to the following it	ems·		,		
_	Box No. I							
	Box No. 1	Basis of the opin	ноп					
-	Box No. III	•	ent of opinion with reas	rd to novelty inventive	e step and industrial applic			
	Box No. IV	Lack of unity of i	nvention	ira to rioverty, iriveritive	e step and industrial applic	ability		
⊠ B	Box No. V	Reasoned stater		2) with regard to novel	ty, inventive step or indust	rial		
□в	Box No. VI	Certain documer		o apporting odom otate				
	Box No. VII		n the international app					
□в	Box No. VIII	Certain observat	ions on the internation	al application				
Date of submission of the demand Date of completion of this report

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2004/007006

_	Box No. I Basis of the repo	ort				
1.	. With regard to the language, to filed, unless otherwise indicates	language, this report is based on the international application in the language in which it was				
	☐ international search (u☐ publication of the intern	anslations from the original language into the following language, translation furnished for the purposes of: Inder Rules 12.3 and 23.1(b)) Inational application (under Rule 12.4) In y examination (under Rules 55.2 and/or 55.3)				
2.	With regard to the elements* of the international application, this report is based on <i>(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):</i>					
	Description, Pages					
	1-12	as originally filed				
•	Claims, Numbers					
	2-9 ,	as originally filed				
	1	received on 09.05.2005 with letter of 04.05.2005				
	Drawings, Sheets					
	1/2, 2/2	as originally filed				
	☐ a sequence listing and/or a	any related table(s) - see Supplemental Box Relating to Sequence Listing				
3.	The amendments have resulted in the cancellation of:					
	the description, pages	·				
	☐ the claims, Nos.☐ the drawings, sheets/fig	•				
	the sequence listing (s)	pecify):				
	any table(s) related to	sequence listing (specify):				
4. [had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).					
	the description, pages					
	☐ the claims, Nos.☐ the drawings, sheets/fig	IS				
	the sequence listing (si	pecify):				
		sequence listing (specify):				
	* If item 4 applies, s	ome or all of these sheets may be marked "superseded."				

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2004/007006

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-9

No: Claims

Inventive step (IS) Yes: Claims 1-9

No: Claims

Industrial applicability (IA) Yes: Claims 1-9

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

PCT/EP2004/007006

The closest prior art is a switched mode power supply as shown in Figure of the present application or in the st microelectronic data sheet US2842/3842 (D1). This smps has a transformer whith a primary winding and a secondary winding, a switching transistor in series with the primary winding and a control circuit for controlling an output voltage, the control circuit contains an oscillator which can be set via a terminal of the control circuit.

The present invention by the use of relaitively simple means aims to increase the oscillation frequency in order to shorten the start-up period of the smps.

The inventive solution thereto is realized by coupling the oscillator set terminal to a secondary winding.

The oscillator set terminal 4 in Fig. 11 of D1 is not coupled to the secondary winding Nc because it is connected via a capacitor C6 to ground.

This additional circuitry distinguishes the invention from the closest prior art in a novel and inventive manner, Article 33(2)(3) PCT.

The dependent claims 2-9 concern advantageous embodiments of the invention and are as such novel and inventive, Article 33(2)(3) PCT.

Industrial applicability of the present invention in the sense of Article 33(4) PCT is obviously possible.

EP2004/007006 PD030073

Hannover, 04 May 2005

1

New Claim 1 (Shall replace present claim 1)

A switched mode power supply having a transformer
 (T1), which has a primary winding (W1) and at least one secondary winding (W2 - W5), having a switching transistor (Q1) in series with the primary winding (W1) and a control circuit (IC1) for controlling an output voltage (U3 - U5), the control circuit (IC1) containing an oscillator (O) which can be set via a terminal (4), characterized in that the terminal (4) is coupled to a secondary winding (W2) for increasing the oscillation frequency of the switch switched mode power supply during operation, with regard to the start-up phase.
